WEATHER KEY POINTS

07/20/19 - 07/26/19

Saturday-Sunday

- Isolated thunderstorms across the Northern Sierra Saturday-Sunday, mainly south of Lake Tahoe
- Dry and breezy afternoon conditions will create slightly elevated fire weather concerns for portions of southern Coastal, Southern and Inland Regions
- Generally near normal temperatures Saturday with a slight warming trend into Sunday
 - Some southern Desert areas will still be hot enough to have slightly elevated heat related impacts possible

Monday-Friday

- Warming and drier conditions will continue slightly elevated fire weather concerns for southern portions of Coastal Region, mainly northern portions of Inland Region, and eastern portions of Southern Region. Breezy afternoon and evening winds will also add to these issues for portions of Inland Region and eastern areas of Southern Region each day.
- Isolated thunderstorms possible over the high Sierra Monday-Tuesday and then also across portions of Southern Region Wednesday-Friday
- Temperatures will gradually warm across the state with increasing heat related impacts (peaking Wednesday-Friday) possible for portions of Inland Region (including some Sierra foothills areas where overnight temperatures will not offer much relief from the heat), and continued potential for heat impacts in the Southern Region desert areas
